

Specialists in Energy & Engineering Recruitment

progressive[®]
experts in your field

With over 25 years of experience, Progressive Recruitment is a global market leader within recruitment for the Energy and Engineering sector. We are a strategic recruitment partner for companies looking to hire in the energy (especially renewable energy), automotive, mechanical, robotics, electrical and industrial sectors. We can help you find the right talent your business requires to expand and grow as we understand the rapidly changing needs in Japan. Our approach is simple: we work with you to understand your needs, followed by sourcing for highly skilled and experienced candidates that can help you achieve your business goals.

Progressive Recruitment is part of the larger SThree group, a recruitment organisation specialising within the STEM (Science, Technology, Engineering, Mathematics) industry.

Why choose us?

Experts in the energy & engineering recruitment industry which allows us to tailor our services to your requirements and internal processes.

Proven track record of placing top talent with companies of all sizes and types within the energy and engineering industry.

With a vast database, network of advertising activities as well as an active organiser in events within Japan, we have an efficient approach to source and network with some of the best talent in the market.

Deep understanding of the industry, that has been developed through global experience, strong market knowledge as well as local expertise.

Our success: More than 85% of our customers are repeat customers who experienced a high level of satisfaction.

We have highly specialised and experienced consultants that have worked in Japan's energy and engineering sector.

Our approach to ESG

Part of the larger SThree group, together we play an active role within ESG (Environmental, Social and Governance) as we recognise the importance of ensuring long-term sustainability through concerted and transparent climate and environmental action. Two of our objectives include:

By 2024...

Reduction of our carbon emissions

Doubling the share of our renewable business
